BRICK-BY-BRICK™
SOCIAL SKILLS PROGRAM

Brick-by-Brick™ is a small group program, proven to help children aged 5-12 years with social difficulties, including Autism Spectrum Disorder (ASD), to improve and practice their social interaction and communication skills.

A fun and supportive group for your child to thrive

Using the principles of Play Therapy, our professionals create an engaging and understanding environment for your child to build important skills such as sharing, waiting, turn-taking, talking with others and making friends.

Learning through responsibility and problem-solving

In each 1.5 hour session, children learn a clear set of rules and LEGO® building skills. They agree upon a project that is achievable for everyone in the group, and are assigned roles with specific responsibilities - the Architect, Supplier and Builder. Roles are rotated so children can learn different skills and responsibilities.

What's included in the program?

Before starting the program, there will be an initial interview with the child and parent to understand the needs of the child. Children then attend small-group sessions with a maximum of 6 children per group.

Learning Links runs the program weekly during school terms. Each session is 1.5 hours, with parents able to attend the first and last 15 minutes of each session
